**STEP BY STEP BUILD PLAN**

First, you'll need to purchase a murphy bed hardware kit. Murphy beds can be quite complicated to build, and we recommend that you closely follow the instructions provided with your kit. Each kit has a weight limit, so you'll need to determine the weight of your mattress and the person who will be sleeping in the bed to make sure you purchase the correct kit.

Once you've built the murphy bed, paint or stain it however you'd like.
