Pocket screws

RELOVE SIDE TABLE

EYES FOR THE JOB- EPISODE 207.1

'REDUCE, REUSE, RELOVE'

STEP BY STEP BUILD PLAN

1. Make a box from melamine
 - a. Mitre all ends on a 45-degree angle
 - b. Glue all pieces together
 - c. Clamp until dry
2. Assemble the base
 - a. Cut fence board to size
 - b. Attach pieces of base together using pocket holes
3. Build the drawer
 - a. Use a drill press to create a hole in the front board for a drawer pull
 - b. Use plywood to create the rest of the drawer. Attach the drawer pieces together using dado joints, glue, and an air-nailer.
 - c. Make grooves in 2 sides of the drawer to act as drawer tracks
4. Attach the base to the box
 - a. Drill pocket holes into the base
 - b. Attach the base to the melamine box using pocket screws
5. Attach 2 pine strips to the inside of the melamine box for sliders
6. Attach a melamine back to the box using an air-nailer
