

DUST COLLECTION

EYES FOR THE JOB- EPISODE 201.2

'MAKIN' IT WORKSHOP'

Dust collection is essential in keeping your workshop safe and clean. Good dust collection can prevent fires, accidents, and respiratory issues when done properly.

Dust collection can mean different things to different people. Traditional dust collection collects the same dust and chips you could sweep up with a broom. Fine dust collection provides traditional dust collection plus collects most of the airborne particles that are unhealthy and invisible.

You can install a dust collection system yourself, but we recommend consulting a dust collection professional before you start to make sure your system is safe, effective, and meets your needs.
